

Job Title: Junior Business Analyst

About Us

Sigmoid empowers enterprises to make smarter, data-driven decisions through Data Engineering, AI, and Analytics. We partner with Fortune 500 companies across Retail, BFSI, Life Sciences, Manufacturing, and other industries to build cloud-native data platforms, AI solutions, and business analytics products that solve complex business problems at scale.

What You'll Do

As a Junior Business Analyst, you will work with experienced consultants, data engineers, and data scientists and your mentors to solve real-world business problems using data and analytics.

Key Responsibilities

- Analyze business and data problems to generate actionable insights.
- Quick & exploratory data analysis for generating rapid insights
- Write SQL queries to extract, clean, and analyze data.
- Work with cross-functional teams to understand business requirements and translate them into analytical solutions.
- Support data validation, quality checks, and documentation activities.
- Present findings through clear visualizations and business storytelling.
- Learn and apply modern Analytics, AI, and Generative AI technologies as part of project delivery.

Who We're Looking For

- Final-year or recent graduate (B.E./B.Tech) from a recognized university.
- Strong analytical thinking and problem-solving aptitude.
- Good understanding of SQL, Excel, and basic programming concepts.
- Exposure to Python or R through coursework, projects, or internships.
- Familiarity with Power BI or Tableau is an added advantage.
- Strong communication, collaboration, and presentation skills.
- Curious, self-motivated, and eager to learn new technologies.
- Ability to work effectively in a fast-paced, team-oriented environment.

Preferred Qualifications

- Academic projects or internships in Data Analytics, Business Intelligence, Machine Learning, or Data Science.
- Basic understanding of databases, statistics, and data visualization.
- Participation in hackathons, coding competitions, analytics case studies, or open-source projects is a plus.

What You'll Gain

- Hands-on experience working with global Fortune 500 clients.
- Structured learning and mentorship from experienced analytics professionals.
- Exposure to cloud technologies, AI, Generative AI, and modern analytics platforms.
- Fast-track career growth in Data, Analytics, and Consulting.
